ELSEVIER

Volume 381, Numbers 1–2, 24 January 1995

JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Contents

Regular papers

Differences between apparent polarization resistance values obtained in the time and frequency domains
S. Feliu, J.C. Galvan, S. Feliu Jr., J. Simancas, J.M. Bastidas, M. Morcillo (Madrid, Spain) and E. Almeida (Lisboa, Portugal) 1

Potential-step chronofluorometric response of fluorescent-ion transfer across a liquid|liquid interface
T. Kakiuchi and Y. Takasu (Yokohama, Japan) 5

Calculation of outer Helmholtz potential at mercury as a function of temperature and concentration of aqueous sodium fluoride solutions
E. Kirowa-Eisner, D. Tzur and M. Schwarz (Tel-Aviv, Israel) 11

Rapid chemical decolorization reaction of H_xWO_3 thin films and reversible operation of photochromism of WO_3
E. Kikuchi, N. Hirota, A. Fujishima (Tokyo, Japan), K. Itoh and M. Murabayashi (Yokohama, Japan) 15

Electrodes modified with synthetic clay minerals: evidence of direct electron transfer from structural iron sites in the clay lattice
Y. Xiang and G. Villemure (New Brunswick, Canada) 21

Temperature dependence of the transfer coefficient for the hydrogen evolution reaction on the DME
E. Kirowa-Eisner, M. Schwarz, M. Rosenblum and E. Gileadi (Ramat-Aviv, Israel) 29

Photoelectrochemical studies of colloidal TiO_2 films: The effect of oxygen studied by photocurrent transients
A. Hagfeldt, H. Lindström, S. Södergren and S.-E. Lindquist (Uppsala, Sweden) 39

Bioelectrocatalytic hydroxylation of nicotinic acid at an electrode modified with immobilized bacterial cells of *Pseudomonas fluorescens* in the presence of electron transfer mediators
K. Takayama, T. Kurosaki, T. Ikeda (Kyoto, Japan) and T. Nagasawa (Nagoya, Japan). 47

Potential-modulation-induced microwave reflectivity measurements on silicon in fluoride solutions
G. Schlichthörl and L.M. Peter (Bath, UK) 55

Spectroelectrochemical characterization of ultra-thin films formed by electropolymerization of phenothiazine derivatives on transparent gold electrodes
D.D. Schlereth, W. Schuhmann and H.-L. Schmidt (Freising-Weihenstephan, Germany) 63

Electrochemistry of poly(aniline-*co*-*N*-butylaniline) copolymer: comparison with polyaniline and poly(*N*-butylaniline)
S. Ye, S. Besner, L.H. Dao and A.K. Vijh (Québec, Canada) 71

Promoter effect of halogen anions on the direct electrochemical reaction of cytochrome *c* at gold electrodes
X. Qu, J. Chou, T. Lu, S. Dong (Changchun, People's Republic of China), C. Zhou and T.M. Cotton (Ames, IA, USA) 81

The application of microelectrodes to the study of photochemical reactions
R.G. Compton, J.C. Eklund and L. Nei (Oxford, United Kingdom) 87

Cyclic voltammogram of Rh(100), Pt-deposited Rh(100) and chemically reconstructed Pt/Rh(100) surfaces
H. Tamura, A. Sasahara and K.-i. Tanaka (Tokyo, Japan) 95

Ohmic distortion of current–potential curves at wall-jet electrodes
B.A. Coles, R.G. Compton (Oxford, UK), C.M.A. Brett and A.M.C.F. Oliveira Brett (Coimbra, Portugal) 99

In-situ scanning tunneling microscopy of well-ordered Rh(111) electrodes
L.-J. Wan, S.-L. Yau, G.M. Swain and K. Itaya (Sendai, Japan) 105

In situ examination of anodic silver oxide films by EXAFS in the reflection mode
D. Hecht, P. Borthen and H.-H. Strehblow (Düsseldorf, Germany) 113

Transpassivity of molybdenum in H_2SO_4 solution
M. Bojinov, I. Betova and R. Raicheff (Sofia, Bulgaria) 123

Charge propagation in $[Os(bpy)_2(PVP)_xCl]Cl$ polymers. An example of mean field behavior in a system with constrained diffusion of redox sites?
H. Larsson and M. Sharp (Umeå, Sweden). 133

Surface characterization of thin-film platinum electrodes for biosensors by means of cyclic voltammetry and laser SNMS
E. Aschauer, R. Fasching, G. Urban, G. Nicolussi and W. Husinsky (Wien, Austria) 143

Voltammetric and impinging jet study of the behaviour of rhodized electrodes in acidic perchlorate solutions
M. Wasberg and G. Horányi (Åbo, Finland) 151

Redox properties of novel tetrapyrroles: expanded porphycenes
C. Bernard, J.P. Gisselbrecht, M. Gross (Strasbourg, France), N. Jux and E. Vogel (Cologne, Germany) 159

Electro-oxidation of CO and methanol on graphite-based platinum electrodes combined with oxide-supported ultrafine gold particles
P.C. Biswas, Y. Nodasaka, M. Enyo (Sapporo, Japan) and M. Haruta (Ikeda, Japan) 167

Electroreduction of the Schiff base of pyridoxal-5′-phosphate and hexylamine in dimethylformamide and methanol. Effect of the self-protonation
J.M. Sevilla, G. Cambron, T. Pineda and M. Blázquez (Córdoba, Spain) 179

Statistical mechanics of polynuclear ring complexes with mixed-valence states by use of the Ising model
K. Aoki (Fukui-shi, Japan) 185

Kinetic analysis of the enzyme electrode composed of GOx adsorbed on an alkanethiol SAM modified Pt surface
X.-D. Dong, J. Lu and C. Cha (Wuhan, China) 195

Adsorption behavior of functionalized ferrocenylalkane thiols and disulfide onto Au and ITO and electrochemical properties of modified electrodes: effects of acyl and alkyl groups attached to the ferrocene ring
T. Kondo, M. Takechi, Y. Sato and K. Uosaki (Sapporo, Japan) 203

Short communications

Chemical limitations to the anodic dissolution of p-Si in fluoride media in the presence of alkali metal cations
H.H. Hassan (Meudon, France), J.-N. Chazalviel (Palaiseau, France), M. Neumann-Spallart (Meudon, France), F. Ozanam (Palaiseau, France) and M. Etman (Meudon, France) 211

In situ reactivity of the electrochemically generated nitro radical anion from nitrendipine with glutathione, adenine and uracil
L.J. Núñez-Vergara, F. García (Santiago, Chile), M.M. Domínguez (Seville, Spain), J. De la Fuente and J.A. Squella (Santiago, Chile) . 215

Design of a potentiostat suitable for dielectric relaxation measurements
W.-l. Lim and T.J. VanderNoot (London, UK) 221

The influence of the solvent on the kinetics of silver electrodeposition
V.N. Titova, V.A. Kazakov, N.V. Petrova (Moscow, Russia) and S. Białłozor (Gdańsk, Poland) 227

Determination of kinetic parameters of 1,1′-diacylferrocene at a gold microdisc electrode
Z. Jun, J. Wang, Z. Tai and H. Ju (Nanjing, People's Republic of China) 231

Preliminary notes

Electrochemical immobilization of enzymes on conducting organic salt electrodes: preparation of an oxygen independent and interference-free glucose biosensor
F. Palmisano, D. Centonze, C. Malitesta and P.G. Zambonin (Bari, Italy) 235

Electrochemical digital etching in non-corrosive electrolyte: $I_{(ads)}$-catalyzed dissolution and reordering of ion-bombarded Pd(111)
J.B. Abreu, R.J. Barriga, W. Temesghen, J.A. Schimpf and M.P. Soriaga (College Station, TX, USA) 239

Electrocatalysis by polyoxometalate|polymer systems: reduction of nitrite and nitric oxide
B. Keita, A. Belhouari, L. Nadjo (Orsay, France) and R. Contant (Paris, France) 243

Cathodic electrodeposition of CdTe on n-type monocrystalline silicon
Y. Sugimoto and L.M. Peter (Southampton, United Kingdom) 251

Electro-oxidation of tetra(terthienyl)silanes: towards 3D electroactive π-conjugated systems
J. Roncali, C. Thobie-Gautier, H. Brisset, J.-F. Favart (Angers, France) and A. Guy (Paris, France) 257

Atomic arrangement dependence of reduction rates of carbon dioxide on iridium single crystal electrodes
N. Hoshi, T. Uchida, T. Mizumura and Y. Hori (Chiba, Japan) 261

Effect of isomeric dicarboxylic anions on the reconstruction phenomena of Au(100)
P. Skołuda (Poznań, Poland) 265

Adsorption of aromatic hydrocarbons on an electrode: a molecular dynamics study
S.-B. Zhu (Palo Alto, CA, USA) 269

Radiolytic effects on the in situ investigation of buried interfaces with synchrotron X-ray techniques
Z. Nagy and H. You (Argonne, IL, USA) 275
